c) using a digital camera to pick up the light transmitted by the ophthalmic lens and pattern filter; d) processing the signal output by the digital camera to determine the position of the engraved marking of the ophthalmic lens in a stationary frame of reference (claim 9); and e), the camera is used to pick up at least one positioning image formed in shadow by a passive pointer provided on the support and wherein in step f) deducing the value of centering characteristic from the known position of the support and from the positions of the permanent marking of the ophthalmic lens and the camera is used to pick up at least one positioning image formed in shadow by a passive pointer provided on the support (claim 11) (claim 11 allowed previous office action 1/22/2008).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
